Monterey Complete Disease Control

Biofungicide/
Bactericide

Monterey Complete Disease Control is a broad-spectrum preventative biofungicide/bactericide for control or suppression of fungal and bacterial plant diseases on roses, vegetables, fruits, nuts, flowers, houseplants, foliage, trees, and shrubs in residential landscapes, lawns, home gardens, and residential greenhouses.

Biofungicide/
Bactericide

- *One Pint does 2-3x as much as a quart of the leading competitor
- *Soil drench stays as long as the plant grows
- *Available in Drench and Foliar
- *Works curatively, not preventatively
- *Symbiotic relationship with root system, it grows with the roots!
- *Controls downy mildew, early blight, late blight, brown spot, scelrotinia, fusarium, verticillium, bacterial speck and more!
- *Approved for organic gardening. Safe for honeybees, worms and natural predators
